Updates from Nashville International Airport as Terminal Roadway Project Ramps Up

*Entrance Off Donelson Pike Near Economy Parking Lot Closed to Through Traffic and
Cell Phone/Waiting Area Temporarily Closed*

NASHVILLE, Tenn. – The Nashville International Airport terminal entrance off of Donelson Pike, nearest I-40 and adjacent to the Economy Parking Lot, is temporarily closed as work on the Terminal Access Roadway Improvements (TARI) Project continues. The main airport entrance off of Donelson Pike, adjacent to the Long-term Parking Lot, remains open. Drivers can still access the Economy Parking Lot from Donelson Pike, but terminal access from that entrance has been closed and is expected to remain so until mid-February. Intermittent closures of the Donelson entrance should be expected through October.

On Jan. 5, the cell phone/waiting area at Nashville International Airport closed temporarily. Alternate options for customers who are meeting and waiting for arriving passengers include the short-term parking garage, which provides 30 minutes of free parking, and the 10-minute waiting area on the baggage claim level.

“Improving the safety and accessibility of terminal roadways underscores our commitment to providing the Nashville Airports Experience to all of our passengers and partners,” said Raul Regalado, president and CEO of the Metropolitan Nashville Airport Authority.

During road construction, BNA encourages travelers and guests to allow extra travel time and reduce speed through construction zones. All short-term, long-term, and economy parking lots will remain open during the TARI Project. The overflow lot will be open only as needed. More information about the project, including detailed maps, can be found online at www.flynashville.com.

To receive e-mail updates about this and other projects, frequent fliers may sign up for AIRreport, the Metropolitan Nashville Airport Authority’s e-mail distribution list. AIRreport provides a convenient way to keep up with airport news, including renovation updates, new projects and other timely announcements. To join, visit www.flynashville.com, click on the blue AIRreport button.

Background on Terminal Roadway Project

Phase I of the Terminal Access Roadway Improvements (TARI) Project is underway. TARI is designed to improve traffic conditions on Terminal Ring Road, the one-way thoroughfare that surrounds the airport’s short- and long-term parking lots and provides access to the terminal. TARI will eliminate the need for vehicles to merge and weave through multiple lanes of traffic on Ring Road, and will improve ingress/egress from both I-40 and Donelson Pike.

The Metropolitan Nashville Airport Authority (MNA) was established in 1970, and owns and operates the Nashville International Airport (BNA) and John C. Tune Airport (JWN). For more information, please visit www.flynashville.com.
